PRODUCT DESCRIPTION

The 92 aluminum profile, flexible with vertical bending capacity and plastering integration, is designed to meet the demands of modern architectural designs. Suitable for LED strips up to 20 mm wide (sold separately), this profile harmonizes with the plasterboard structure, offering a smooth and refined finish. Its 6063-T5 aluminum construction ensures efficient heat dissipation, allowing uniform and continuous linear lighting.

FEATURES

- Designed to give a uniform light without hotspots
- Vertical bending enables the creation of curved configurations.
- Application guide for 20mm LED engine or less.
- Made of ALCOA 6063-T5 aluminum alloy increasing heat dissipation.
